## 55% Reduction in Water Usage for Inaugural Installation of Niagara Stealth Toilets

Holiday Inn Express Hotel & Suites in Surprise, AZ is the first hotel in the U.S. to install Stealth Toilets

Headquartered in Arizona, Advance Management & Investment, LLC (AMI) operates and manages hotels under various flags, such as Marriott, Hilton, Wyndham, and Holiday Inn Express Hotel and Suites. AMI is known for its development and management of quality upscale hotels.

After AMI opened a new Holiday Inn Express Hotel & Suites in Surprise, they were introduced to Niagara's Stealth toilet and its water and energy-saving properties by Del Johnston, owner of The Marketing Pros in Scottsdale, AZ.

The presentation demonstrating the quiet flushing action, one-button flush, water-saving and the 100% cleaning action of the bowl convinced them to retrofit the entire property. Johnson also went the extra step in arranging for the complete professional installation and removal of all of the older 3.5 GPF toilets.

Since the Stealth installations, they are using 55% less water than with the previous toilets. Best of all, they have received no complaints from hotel guests as the Stealth toilet continues to perform quietly and flawlessly.

Mike Patel, owner of Holiday Inn Express and Suites, was so pleased with the results that they have installed 100 Stealths in a second property. Describing his experience with the second property, Patel added "Same performance, quality, and water-savings."

*"We were so happy with the performance of the Stealth in our Phoenix property, we've installed 100 more in another hotel. It amazes me that the Stealth uses half the water of standard toilets, but NEVER CLOGS."*
